3 Read the following passage, then answer the questions :

I work for an English language news website. I started at a newspaper, but I think more people read news online now, so I prefer this job. Lots of different journalists send me their articles, and I have to decide which ones are the most important. These will be the first ones that our readers will see.

Before the article goes on the website, I also have to check the facts that are in it. I look at two or three different websites in which I trust to do this. Then I check the writing. Sometimes, there are spelling mistakes or the language.

I studied English and journalism at university. First, I wanted to be a journalist, but then I decided that I preferred this job. It is very interesting because I can look at so many people's articles.

It's not very easy to understand. It's my job to make the article as easy to understand as possible. Finally, I have to choose photographs to go with the article. Sometimes a photographer sends these, but usually we get them from other websites.

Caracals usually have between three and six (4) kittens who stay with their mother for about ten months. Caracals can live for up to 12 years in the wild.

3 Read the following passage, then answer the questions :

Our planet is getting hotter and our weather is changing. There are more floods, droughts and forest fires than at any time in history. One of the reasons for this is climate change.

Climate change is caused by greenhouse gases such as carbon dioxide. These are made when we burn fossil fuels such as oil. Rubbish in landfill sites makes a greenhouse gas called methane. Deforestation also produces greenhouse gases. Trees **absorb** carbon dioxide from the air. When we cut down trees, the carbon dioxide stays in the air.

If we keep burning fossil fuels, climate change will get worse. So, we need to use cleaner renewable energy such as solar energy and wind power. We must start recycling more rubbish and stop putting rubbish in landfill sites. If we recycle more paper, we can avoid cutting down our forests. This will help slow down climate change.

Buildings cause 6 % of our greenhouse gases. If we keep (1) building houses in the same way, global warming will continue. I think we should start designing (2) houses that need to use less (3) electricity from fossil fuels. We can do this by planning to build houses that use (4) renewable energy.

3 Read the following passage, then answer the questions :

There is seagrass in the sea along the coast of many countries. It is food for many sea animals, including turtles. Baby fish and sea animals live in seagrass because it is a safe place.

Seagrass helps keep the sea healthy and it can help stop climate change. This is because seagrass absorbs 10 % of the ocean's carbon dioxide every year. Seagrass absorbs carbon dioxide 35 times faster than rainforests. That is why seagrass can help stop climate change.

About 90 % of all seagrass has disappeared from the UK's coast in the last 100 years. However, there is an environmental project in the UK that is growing new seagrass. When the plants are big enough, divers will plant them along the coast. The plants will still be quite small. Nevertheless, they will grow into 20.000 square metres of seagrass.
