Aspheric lenses market will grow at a rate of 6.50% for the forecast period of 2021 to 2028. Rise in disposable incomes of the middle-class households to buy convenience products such as parchment papers is an essential factor driving the aspheric lenses market. An aspheric lens is a type of lens whose surface profiles are not portions of a cylinder or sphere. In photography, a lens assembly that comprises an aspheric element is basically called an aspherical lens. The asphere's more complex surface profile can reduce or eliminate spherical aberration and also helps in reducing other optical aberrations such as astigmatism, when compared to a simple lens.
